EDUCATION

KAIST — B.S. Mechanical Engineering; Double Major: Electrical & Electronic Engineering 2024–2028 (Expected)

Hansung Science High School — Graduated Mar 2021 – Feb 2024

RESEARCH EXPERIENCE

FAIR Lab (Field AI & Robotics Lab), KAIST | Undergraduate Researcher Mar 2026 – Present

- MOTAR: Reinforcement learning for moving-target detection, tracking, and UAV interception in cluttered environments; PPO simulations and performance evaluation across obstacle and target conditions.

DRCD Lab, KAIST | Undergraduate Researcher Sep 2025 – Jan 2026

- Researched gait stabilization and control systems for the BOLT bipedal robot.

SELECTED PROJECTS

MOTAR — UAV Reinforcement Learning & Autonomous Flight 2026

- Evaluated moving-target tracking, path planning, and obstacle avoidance in simulation.

Mechanical Engineering Student Council Website | Web Development 2026

- Planned and developed a department website for announcements and event information.

Babdoduk — Personal Web Project 2026

- Developed and deployed a campus event information service using Vercel.

LEADERSHIP & ACTIVITIES

President, Mechanical Engineering Undergraduate Student Council, KAIST 2026 – Present

- Organized department events and orientations, represented student feedback, and improved study-cafe facilities.

Math & Science Mentor, KAIST Gifted Education Center & KSOP 2026

- Guided learning activities, assessed assignments, and provided individual feedback.

Class Representative, Mechanical Engineering (2024 Cohort), KAIST 2025

- Facilitated student communication and supported department activities.

SKILLS & LANGUAGES

Programming & Web: Python, C, Git/GitHub, Next.js, Vercel

Robotics & CAD: Reinforcement Learning (PPO), UAV Simulation, SolidWorks, Onshape

English: OPIc IH

OTHER ACTIVITIES

KAKI (Snowboarding, Former Vice President) · **Stroke** (Tennis, 2024 Cohort Representative) · **MR** (Robotics Club)
